### Stay InTouch

l'm InTouch's newly updated server software, Corporate Server Edition Version 2.0, provides users with a host of server communications that can be accessed via PCs, cell phones and PDAs. Wireless access features include full desktop viewing and control from most Pocket PC devices. Non-Pocket PCs support access and management of data, as well as the ability to invite remote guests to your PC for online demonstrations. In addition, users can easily and rapidly transfer files between devices. Price: Starts at \$1,995.
