***Hitachi Business Solution Co., Ltd. and 01 Communique
announce availability of I'm InTouch – Corporate Edition for
the Japanese market.***

TORONTO, ON – March 15, 2005 – 01 Communique Laboratory Inc. (TSX: ONE – www.01com.com) a leading remote access solutions provider, today announced that its I'm InTouch – Corporate Edition is now available in Japan and is being marketed by Hitachi Business Solution Co. Ltd., a group company of Hitachi (NYSE:HIT).

As part of the terms of an agreement between the two companies, 01 Communique and Hitachi Business Solution co-developed a corporate edition of 01 Communique's award winning I'm InTouch remote access software and customized it for the Japanese market. Hitachi Business Solution has exclusive rights for marketing in Japan under a co-owned brand name, DoMobile Corporate Edition, and pays 01 Communique a royalty based on sales in Japan. DoMobile Corporate Edition is now complete and is shipping in the Japanese market.

The DoMobile Corporate Edition is a customer hosted and managed remote access solution installed within the corporate firewall, used by large and mid-sized companies to provide real-time access to their corporate information and network. A clientless solution, requiring only a Web browser for secure access to the enterprise, the service works seamlessly across all wireless operator networks and provides an organization the flexibility to deploy a variety of wireless devices along with utilizing existing laptops and PC's to connect. Built on I'm InTouch's patent-pending technology, DoMobile Corporate Edition has I'm InTouch's stringent security controls that meet the rigorous requirements of corporate IT personnel, the ability to scale with the growth of an organization, and provides enhanced administrative functionality allowing IT administrators to centrally provision users and track system usage. They have under their control the most comprehensive remote access solution in the market today that can be deployed throughout their organization much quicker, easier, and more economical than traditional remote access products.

"We were impressed with the quality, innovation and secure nature of the I'm InTouch technology, which is why we chose 01 Communique as our partner to co-develop an enterprise level remote access offering," says Mr. Yoshiaki Kuwahara, Board Director and Group Executive of the Software Package Solution Group of Hitachi Business Solution. "Our initial market trials and feedback from potential customers gives us a strong degree of confidence that DoMobile Corporate Edition meets the expectations of the Japanese market. We are very excited to have this opportunity to add the Corporate Server Edition to the popular DoMobile product line."

“We value our long standing relationship with Hitachi Business Solution and look forward to building on this with a successful launch of DoMobile Corporate Edition,” said Andrew Cheung, President and CEO of 01 Communique. “The Hitachi Business Solution team’s help in the development and especially the quality assurance phase proved to be invaluable in completing a project of this magnitude and complexity in such a timely fashion. DoMobile Corporate Edition offers Japanese businesses the most comprehensive remote access product on the market today. The Japanese have embraced the Internet much quicker than North Americans and they are well known for their attention to detail and quality. DoMobile Corporate Edition was designed with this in mind – easy access over the Internet from a wide range of devices as well as ensuring it passed the rigid quality assurance benchmarks required for the Japanese market. Now that these objective have been met we are confident Hitachi Business Solution will be successful in their marketing initiatives to the Japanese market.”

About Hitachi Business Solution Co., Ltd.

Hitachi Business Solution Co. Ltd. a group company of Hitachi Ltd. (NYSE:HIT) was established in 1994 as a software solution provider. Hitachi Business Solution focuses on three areas of business. The software solution business develops various types of software, which match a customer's needs. The system solution business provides systems integration through development of our own packaged products and then combines them with the products of leading third-party companies. The information equipment and services business offers PC and Server sales and software installation. Hitachi Business Solution's head office is in Yokohama, with branch offices in Totsuka and Osaka.
