**01 Communique Receives Product of the Year Award from *Communications Solutions***

***I'm InTouch Server Edition Honored for Outstanding Innovation***

**Toronto, ON - June 11, 2008** — **01 Communique** announced today that Technology Marketing Corporation's (TMC) *Communications Solutions* ([www.tmcnet.com/comsol](http://www.tmcnet.com/comsol)) has named **I'm InTouch Server Edition** as a recipient of a 2007 Product of the Year Award. This marks the second year in a row that the company received the award for one of its products.

I'm InTouch Server Edition allows businesses to deploy their own remote access server to provide employees with secure access to their workstations from anywhere. Users can run programs, transfer files, read and send emails, and conduct online presentations or meetings using any computer or wireless device, just as if they were at their workstation. No information is transmitted through third party servers providing enhanced security during the remote access session. Another innovative feature is the patent pending Remote Wake-Up technology that allows users to access their computers even if they are not powered on.

"We are honoured to receive this prestigious award," said Andrew Cheung, President and CEO of 01 Communique. "We always strive to keep one step ahead of the market with innovative features in our product offerings. With the rising costs of hydro and our customers' desire to conserve energy, we have designed into I'm InTouch Server Edition the ability to remotely wake up a shut down PC for a remote access session, which is a very innovative feature. This helps our customers increase their ROI and remain productive."

"01 Communique has been recognized with a 2007 Product of the Year Award for their excellence in the advancement of voice, data and/or video communications," said Rich Tehrani, TMC President and Group Editor-in-Chief of *Communications Solutions*, "01 Communique has proven they are committed to quality and excellence in solutions that benefit the customer experience as well as ROI for the companies that use them. I

am pleased to honor their hard work and accomplishments and look forward to more innovative solutions from them in the future.”

The eighth annual *Communications Solutions* Product of the Year Award recognizes the vision, leadership and attention to detail that are the hallmarks of the prestigious award. The most innovative products and services brought to market in 2007 were selected as recipients of this year’s *Communications Solutions* Product of the Year Award for their groundbreaking achievement.

The 2007 Product of the Year Award winners can be found on the [Communications Solutions](#) Web site.
